

A big proof that God is there.

I will give you many examples also.

### **The smartphone example.**

Think about any smart device like the smartphone, what is the percentage that it has a maker?

From zero to one hundred percent full mark.

Can you say its ninety, seventy or fifty percent?

So it is full mark.

This full mark applies also to the creation.

Can you deny the maker of a smartphone or a wrist watch?

We humans also are made in a smart form which leads to a smart designer.

As the statement says “Smart design leads to a smart designer.”

and let me tell you that even a non-smart design leads to a designer.

Think about the planet as a rock. Or taking in the example other planets. Can it exist without a first initiator?

## **The probabilities one and zero, example.**

No matter what the creations evolved from.. there must be the first initiator.

As probabilities, can one come from zero without a miracle form a higher power?

Let's think about this simple example. The universe having the probability one. And the whole existence as we are in it. Can one come from zero?

Before us there was one, and after us there is one, and we are at the middle and we are denying?

And also that we are in the middle, there is one.

## **The skyscraper example.**

Let me give you a close example. Let's say that you live in a village or a small town without high buildings, If you woke up one day and you saw from the window that there is a skyscraper next to your house, would you believe that it came from nothing and no one have built it?

The universe is that skyscraper, in this example.

Can we ask the same question about The Creator? That who created him?

We can't ask such a question because we are already encapsulated in his test. We are closed in his test in this vast universe.

## *A view from religion,*

As in Islam. The Creator almighty has about ninety nine names. Examples are, The First, The Last, The One, The Most Merciful.

His Almightyness is The First, no one was before him. and The Last, no one is after him in a “Time period scale”.

More religion view, that the Creator almighty is the only who was not been made. And everything except him has been made. And He is the one who made everything. And everything is beneath him. He the almighty is alone without company. He created angels, He created the first human and created a wife for him, He have sent Books with Prophets.

And The Creator have promised the believers that do good deeds, that He will enter them paradise. The best and most beautiful place ever to live in and forever.

May God The Creator, guide us and give us more blessings, everyone, everywhere.
